

SAFETY DATA SHEET

Manufacturer		Company	GASTEC CORPORATION	
information		Address	8-8-6 Fukayanaka, Ayase-city, Kanagawa 252-1195, Japan	
		Telephone	+81-467-79-3910	
		FAX	+81-467-79-3979	
SDS ID SDS_132M_	03	Issue date	31/May/2022	
Product name	Trichloroethyle	ene Detector Tube No	o.132M	
Hazards identification	normal use condi chemical substan	This detector tube, when based on GHS and JIS Z 7252(2019), is corresponded to an article. Under normal use conditions, emits only a small amount of chemical substances, for example, trace amounts of chemical substances, and can be handled as not showing physical and chemical hazards or health hazards to operators. Therefore, this product does not fall under the GHS classification standard.		
Composition and information o ingredients		A product made by impregnating alminium oxide($<5\%$) and porous silica gels($<10\%$) with sulfuric acid($<5\%$) and lead(IV) oxide($<1\%$), and sealing them in glass tubes.		
First-aid measures	and see a docto Skin: If the filler plenty of water. Inhalation: Not a	r. comes into contact wit	nediately flush with plenty of water for at least 15 minutes h the skin, immediately wash with soapy water and flush with e the mouth immediately and see a doctor.	
Fire fighting measures	No special mea	No special measures are needed.		
Accidental release measures		If the detector tube is broken, wear appropriate protective equipment to prevent the filler from adhering to or inhaling the skin or eyes.		
Handling and storage	Handling	detector tube is	of the detector tube are broken off to prevent injury, the smoved away from the eye. Do not touch with bare hands gs, or fillers in the event of breakage of the detector tube.	
	Storage	Store in the ref	rigerator	
Exposure control and protection measures	Not applicable.			
Physical and chemical propertion	Flash point: No	Appearance: A glass tube filled with reagents and sealed at both ends. Flash point: Not applicable. Ignition point: Not applicable.		
Stability and reactivity	Reactivity: Not Conditions to a	Stability: Not applicable. Reactivity: Not applicable. Conditions to avoid: Direct sunlight, high temperature, freezing should be avoided. Hazardous decomposition products: Not applicable.		
Toxicological information	porous silica ge	Filled material is made by adsorbing a small amount of chemicals to alminium oxide and porous silica gels, and there is no hazard information for this. The following describes the hazards to humans of the chemicals and carries as a pure sobstance.		
		Alminium oxide: Acute toxicity: Oral — rat LD50:> 5,000 mg/kg (IUCLID,2000)		

Acute toxicity: Oral—rat LD50:> 5,000 mg/kg (IUCLID,2000)

Dermal—no data
Inhalation(vapor)—no data

Inhalation(vapor)—no data
Inhalation(dust,mist)—no data

```
Acute toxicity:
                                             Oral – rat LD50: > 3,160 mg/kg (EPA pesticide ,1991),
                                                             > 3,300 \text{ mg/kg}, > 2,000 \text{ mg/kg}, > 5,000 \text{ mg/kg},
                                                        > 5,110 mg/kg (ECETOC JACC,2006)(SIDS,2006)
                                             Dermal—rabbit LD50 :> 2,000 mg/kg, > 5,000 mg/kg
                                                                      (ECETOC JACC ,2006) (SIDS ,2006)
                                             Inhalation(dust,mist)—ratLC50(4-h exposure):
                                                         >0.691 \text{ mg/L}, > 2.22 \text{ mg/L},
                                                               0.09~0.84 mg/L, 1.65 mg/L (ECETOC JACC,2006)
                                                              >2.08 mg/L (ECETOC JACC,2006)(SIDS,2006)
                                          Lead(IV) oxide:
                                            Acute toxicity: Oral - no data
                                                    Dermal - no data
                                                    Inhalation - no data
                                          Sulfuric acid:
                                            Acute toxicity: Oral—rat LD50: 2140mg/kg (SIDS,2001)
                                                    Dermal-no data
                                                    Inhalation (dust) — ratLC50(4-h exposure): 0.375mg/L (SIDS,2001)
                                          No data
Ecological information
Disposal considerations
                                          This detector tube contains 18.48mg of lead. Should be disposed properly in accordance with
                                          local regulations.
Transport information
                                          Avoid breakage of the detector tube due to dropping, pressurization, bending, etc.
                                          UN number: Not applicable
                                          UN Classification: Not applicable
                                          IATA: Not applicable
                                          Poisonous and Deleterious Substances Control Law: Not applicable
                                          Fire Defense Law: Not applicable
                                          Marine Regulation Information: Not applicable
Japanese regulatory information
                                          Industrial Safety and Health Law: Hazardous substance No. 189, 165-2, 411, 613(Article 57
                                          -2)
                                          PRTR: 1-305 Lead

                                          This data sheet is provided to businesses that handle hazardous chemical products as reference
                                          information for ensuring safe handling. With reference to this, business operators are
                                          requested to understand that they need to take appropriate measures in accordance with the
                                          actual conditions of individual handling, etc. at their own responsibility, and then use them.
                                          This data sheet is prepared based on JIS Z 7253(2019). The contents of this report have been
                                          prepared based on the latest information as of the date of revision, but if new information is
                                          obtained, it may be added or corrected.
                                          This data sheet is not a guarantee of safety.
