

SAFETY DATA SHEET

Manufacturer		Company	GASTEC CORPORATION	
information		Address	8-8-6 Fukayanaka, Ayase-city, Kanagawa 252-1195, Japan	
		Telephone	+81-467-79-3910	
		FAX	+81-467-79-3979	
SDS ID SDS_133P_03		Issue date	31/May/2022	
Product name	Tetrachloroethylene Detector Tube No.133P			
Hazards identification	This detector tube, when based on GHS and JIS Z 7252(2019), is corresponded to an article. Under normal use conditions, emits only a small amount of chemical substances, for example, trace amounts of chemical substances, and can be handled as not showing physical and chemical hazards or health hazards to operators. Therefore, this product does not fall under the GHS classification standard.			
Composition and information on ingredients	A product mad sulfuric acid(5- Detector tube: A product mad	Pretreatment tube: A product made by impregnating alminium oxide(<5%) and porous silica gels(<10%) with sulfuric acid(5-15%) and lead(IV) oxide(<5%), and sealing them in glass tubes. Detector tube: A product made by impregnating porous silica gels(10-20%) with reagent(<0.1%), and sealing them in glass tubes.		
First-aid measures	and see a docto Skin: If the filler plenty of water. Inhalation: Not a	r. comes into contact wit	nediately flush with plenty of water for at least 15 minutes h the skin, immediately wash with soapy water and flush with e the mouth immediately and see a doctor.	
Fire fighting measures	No special mea	sures are needed.		
Accidental release measures		If the detector tube is broken, wear appropriate protective equipment to prevent the filler from adhering to or inhaling the skin or eyes.		
Handling and storage	Handling	When the ends of the detector tube are broken off to prevent injury, the detector tube is moved away from the eye. Do not touch with bare hands any cuts, fittings, or fillers in the event of breakage of the detector tube.		
	Storage	Store in a cold	dark place	
Exposure control and protection measures	Not applicable.			
Physical and chemical properties	Flash point: No	Appearance: A glass tube filled with reagents and sealed at both ends. Flash point: Not applicable. Ignition point: Not applicable.		
Stability and reactivity	Reactivity: Not Conditions to a	Stability: Not applicable. Reactivity: Not applicable. Conditions to avoid: Direct sunlight, high temperature, freezing should be avoided. Hazardous decomposition products: Not applicable.		
Toxicological information	porous silica ge	Filled material is made by adsorbing a small amount of chemicals to alminium oxide and porous silica gels, and there is no hazard information for this. The following describes the hazards to humans of the chemicals and carries as a pure sobstance.		
		Alminium oxide: Acute toxicity: Oral—rat LD50:> 5,000 mg/kg (IUCLID,2000)		

Dermal—no data Inhalation(vapor)—no data Inhalation(dust,mist)—no data

Porous silica gel:

Acute toxicity:

Oral – rat LD50: > 3,160 mg/kg (EPA pesticide, 1991),

> 3,300 mg/kg, > 2,000 mg/kg, > 5,000 mg/kg,

> 5,110 mg/kg (ECETOC JACC,2006)(SIDS,2006)

Dermal—rabbit LD50 :> 2,000 mg/kg, > 5,000 mg/kg

(ECETOC JACC ,2006) (SIDS ,2006)

Inhalation(dust,mist) — ratLC50(4-h exposure):

>0.691 mg/L, > 2.22 mg/L,

0.09~0.84 mg/L, 1.65 mg/L (ECETOC JACC,2006) >2.08 mg/L (ECETOC JACC,2006)(SIDS,2006)

Lead(IV) oxide:

Acute toxicity: Oral - no data

Dermal—no data
Inhalation—no data

Sulfuric acid:

Acute toxicity: Oral—rat LD50: 2140mg/kg (SIDS,2001)

Dermal - no data

Inhalation (dust) = ratLC50(4-h exposure): 0.375mg/L (SIDS.2001)

No data	
This detector tube does not contain any hazardous components. Pretreatment tube contains 55.44mg of lead. Should be disposed properly in accordance with local regulations. Avoid breakage of the detector tube due to dropping, pressurization, bending, etc. UN number: Not applicable UN Classification: Not applicable IATA: Not applicable Poisonous and Deleterious Substances Control Law: Not applicable Fire Defense Law: Not applicable Marine Regulation Information: Not applicable

This data sheet is provided to businesses that handle hazardous chemical products as reference information for ensuring safe handling. With reference to this, business operators are requested to understand that they need to take appropriate measures in accordance with the actual conditions of individual handling, etc. at their own responsibility, and then use them. This data sheet is prepared based on JIS Z 7253(2019). The contents of this report have been prepared based on the latest information as of the date of revision, but if new information is obtained, it may be added or corrected.

This data sheet is not a guarantee of safety.
