

## **SAFETY DATA SHEET**

Manufacturer		Company	GASTEC CORPORATION	
information		Address	8-8-6 Fukayanaka, Ayase-city, Kanagawa 252-1195, Japan	
		Telephone	+81-467-79-3910	
		FAX	+81-467-79-3979	
SDS ID SDS_174_03		Issue date	31/May/2022	
Product name	1,3-Butadiene Detector Tube No.174			
Hazards identification	This detector tube, when based on GHS and JIS Z 7252(2019), is corresponded to an article. Under normal use conditions, emits only a small amount of chemical substances, for example, trace amounts of chemical substances, and can be handled as not showing physical and chemical hazards or health hazards to operators. Therefore, this product does not fall under the GHS classification standard.			
Composition and information on ingredients	A product made by impregnating alminium oxide( $<10\%$ ) and porous silica gels( $<10\%$ ) with reagent( $<1\%$ ), and sealing them in glass tubes.			
First-aid measures	and see a doctor. Skin: If the filler c plenty of water. Inhalation: Not app	omes into contact wi	mediately flush with plenty of water for at least 15 minutes the the skin, immediately wash with soapy water and flush with see the mouth immediately and see a doctor.	
Fire fighting measures	No special measures are needed.			
Accidental release measures	If the detector tube is broken, wear appropriate protective equipment to prevent the filler from adhering to or inhaling the skin or eyes.			
Handling and storage	Handling	detector tube	s of the detector tube are broken off to prevent injury, the is moved away from the eye. Do not touch with bare hands ags, or fillers in the event of breakage of the detector tube.	
	Storage	Store in a cold	l/dark place	
Exposure control and protection measures	Not applicable.			
Physical and chemical properties	Appearance: A g Flash point: Not Ignition point: N	applicable.	h reagents and sealed at both ends.	
Stability and reactivity	Stability: Not applicable. Reactivity: Not applicable. Conditions to avoid: Direct sunlight, high temperature, freezing should be avoided. Hazardous decomposition products: Not applicable.			
Toxicological information	Filled material is made by adsorbing a small amount of chemicals to alminium oxide and porous silica gels, and there is no hazard information for this. The following describes the hazards to humans of the chemicals and carries as a pure sobstance.			
	Alminium oxide: Acute toxicity: Oral—rat LD50:> 5,000 mg/kg (IUCLID,2000) Dermal—no data Inhalation(vapor)—no data			

## Inhalation(dust,mist) - no data

Ecological information	No data  This detector tube does not contain any hazardous components. Should be disposed prop in accordance with local regulations.		
Disposal considerations			
Transport information	Avoid breakage of the detector tube due to dropping, pressurization, bending, etc. UN number: Not applicable UN Classification: Not applicable IATA: Not applicable Poisonous and Deleterious Substances Control Law: Not applicable Fire Defense Law: Not applicable Marine Regulation Information: Not applicable		
Japanese regulatory information	Industrial Safety and Health Law: Hazardous substance No.189(Article 57-2)		
Other information	References: Chemical Risk Information Platform (CHRIP): NITE Safety website in the workplace of the Ministry of Health, Labour and Welfare  This data sheet is provided to businesses that handle hazardous chemical products as reference information for ensuring safe handling. With reference to this, business operators are requested to understand that they need to take appropriate measures in accordance with the actual conditions of individual handling, etc. at their own responsibility, and then use them. This data sheet is prepared based on JIS Z 7253(2019). The contents of this report have been prepared based on the latest information as of the date of revision, but if new information is obtained, it may be added or corrected.		
	This data sheet is not a guarantee of safety.
